We Offer Techno logical Solutions for Your Security, Peace, and Comfort

Tise Teknoloji

Tise Teknoloji is an electronic security, technology, and system integration company that has achieved many important projects throughout the country with its professional solution-oriented approach that it has adopted since its establishment.

Having the capacity to provide risk and need analysis, project design, application, training, and after-sales professional services with an innovative service approach, Tise enables you to reach all the solutions you need from a single point.

All Around Turkey

Tise has important references in thousands of projects of different scales, from large industrial facilities to public institutions, from bank branches to chain stores, and from small and medium-sized businesses to houses.

We Continue to Work with the Strength We Get from Our Past to Write New Success Stories

From the day we stepped into the world of technology as "Erdem Bilişim" in 2004, we have always worked in line with our principles and by focusing on customer satisfaction.

We are Ready to Help You

We Provide Solutions, Not Products

We always use the most appropriate technology in the solutions we develop for you, without being dependent on brands and stereotyped product portfolios.

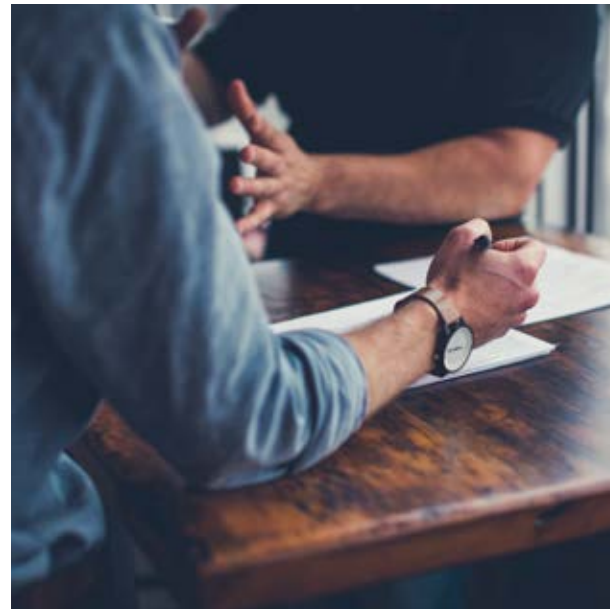

We Work for All Your Needs

You do not need to work with many companies to feel safe, peaceful, and comfortable. We bring together the most suitable solutions for your needs.

We Manage Time and Budget Well

With our benefit-oriented flexible working model, we present the best steps for you with alternative prices and application examples.

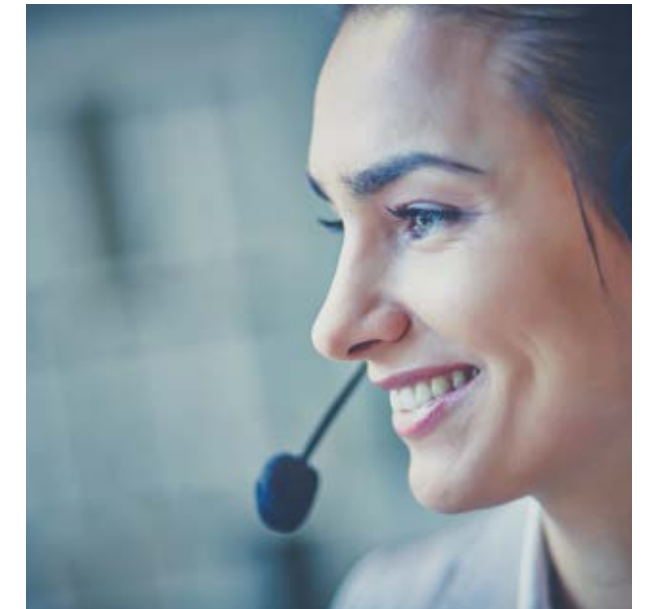

We Also Stand by You After the Project

In order to maintain your satisfaction, we always stand by you with our concept of quality in after-sales services and all the support we offer.

Experience
in every field

Tise Teknoloji has gained important references by successfully realizing many projects of different scales, from small and medium-sized businesses to houses, from bank branches to chain stores, and from large-scale industrial facilities to public institutions.

We Are Ready for the Future!

We set out in 2004 to provide our customers with technologies that will help them feel safe and peaceful. At the point we have reached today, we are happy to see that we have added value not only to our company but also to our industry.

We are proud of every success we have achieved, without compromising on quality, knowing the importance of details and deeply feeling our responsibilities to our customers in every project we provide solutions, provide services and ultimately put our signature under. With the success we have achieved in the light of these values, we have become one of the leading integrator companies in the sector. We believe that we can overcome any challenge with our innovative practices, experience that we continue to gain every day, our goals for the future, and most importantly, our strong team that makes these projects exist.

Special Technology Solutions
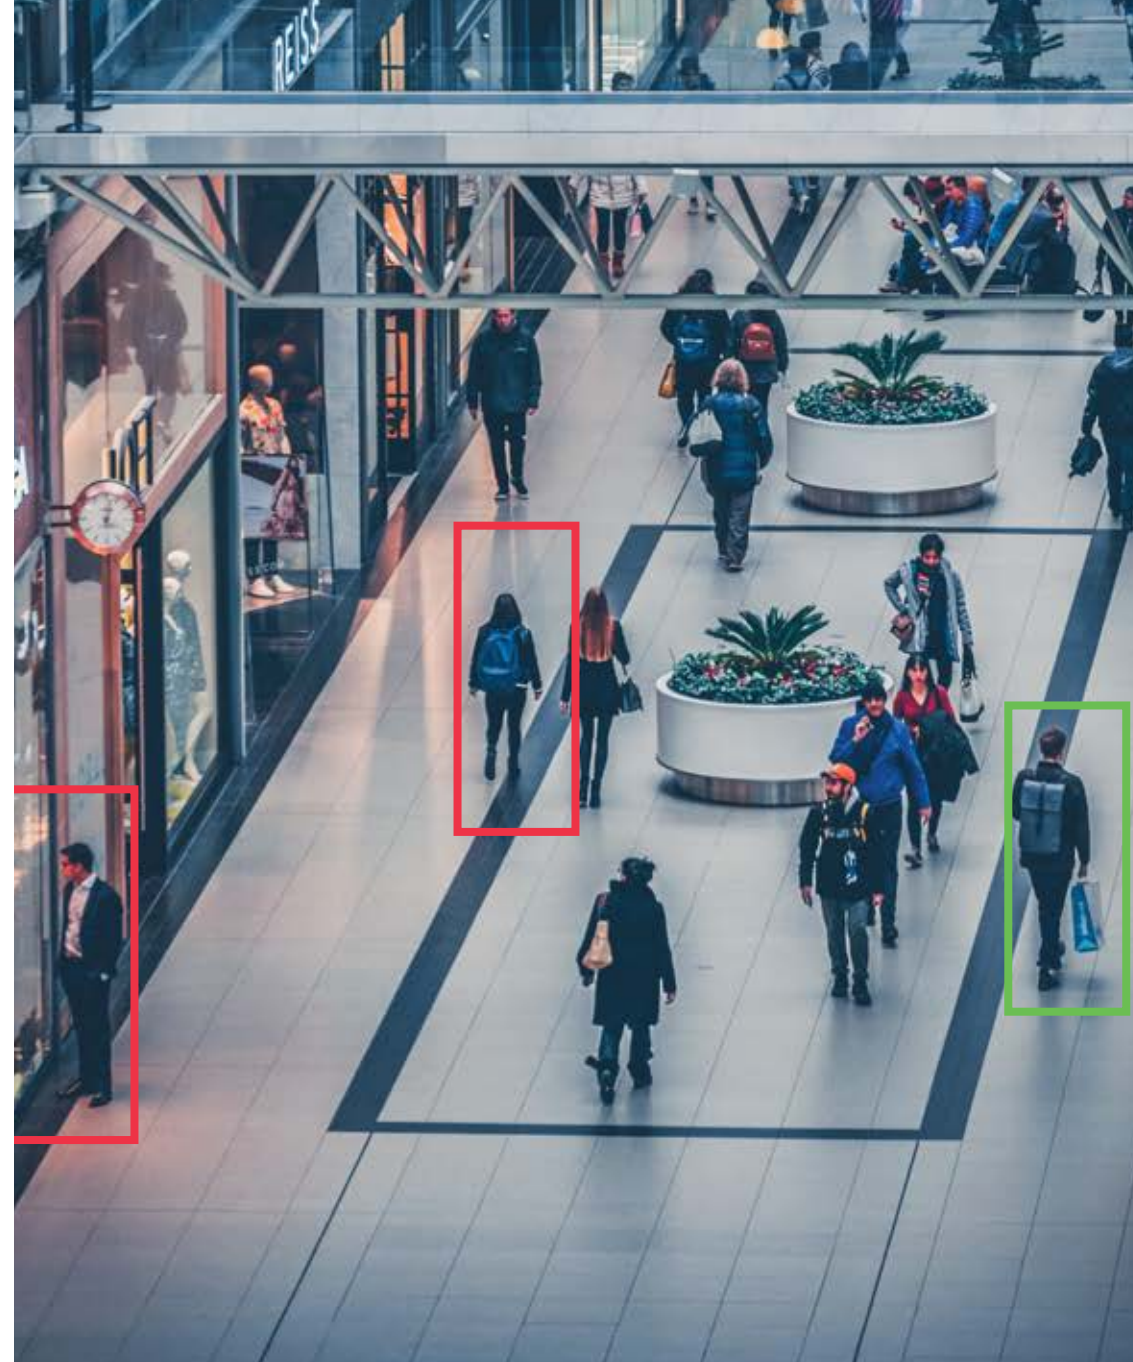

Security Camera Solutions

Keep all control from wherever you are with state-of-the-art security camera systems. With a system designed and implemented according to your demands and needs, prevent unwanted events and put your living and working areas under maximum protection.

An Intelligent Monitoring Technology

With the Intelligent Video Analytics technologies developed in security camera systems, your system monitors violations for you. Your system, which performs the intelligent analytics you choose 24/7 in the areas you specify, instantly informs you in case of any violation.

Wide Product Range Suitable for Projects of Different Scales

Remote Monitoring and Management on All Platforms

Intelligent Monitoring Technologies with Video Analytics

Products at International Standards

Fire Alarm Solutions

Prefer a fire alarm system that will be activated immediately in case of a possible flame, smoke, and gas leak, and will protect you and your living spaces with early warning and accurate information. Choose the best technology to prevent loss of life and property and to minimize your damage.

Fire Detection and Extinguishing Systems

With conventional, addressable or air-sampling fire alarm systems that can be selected according to your needs and risks, you can know the dangers before they grow, and you can prevent loss of life and property with gas and sprinkler fire extinguishing systems.

Burglar Alarm Solutions

Only with a truly high-quality burglar alarm system will you feel safe. Choose advanced Burglar Alarm Systems for your home, workplace, and other valuable living areas that you want to protect.

We Stand by You 24/7!

Live peacefully knowing that the Alarm Monitoring Center, which is at your service 24/7, stands by you for your every need. Feel safe with the Alarm Monitoring Center service, which monitors the signals coming from your system every second, can immediately direct the police, ambulance and fire services to you when necessary, evaluates any malfunctions and maintenance situations that may occur and forwards them to the necessary units.
